EXPERIENCE

Digital Designer: *Gozio Health [2019 - present]*

- Interfaces routinely with C-suite executives at healthcare providers by presenting mobile application mockups and end-user flows.
- Saved hundreds of man-hours by developing scripting and software tools to accelerate the design and development of our mobile apps in the first 90 days on the job.
- Collaborates in an Agile environment, and works across divisions to produce various client deliverables including 3D wayfinding maps, task flows, and UI assets, and visual graphics.

Architectural Design Professional: *PRAXIS3 [2017 - 2019]*

- Coordinated commercial design projects with various clients including Honda, Porsche, and Georgia State University.
- Led project milestone meetings, presented concept and schematic designs to commercial clients, and managed over 10 projects from inception to construction.
- Tasked with localization, implementation, accessibility standards, brand identity, code analysis, schematic design, rendering, and documentation.

Project Architect: *Houser Walker Architecture [2014 - 2017]*

- Developed computational design tools and new design standards that increased productivity by 100% at the civic-minded design firm.
- Headed client presentations, conducted end user research, created visual designs, and coordinated building construction milestones for 10+ institutional projects, including libraries, universities, and museums.

Intern Designer: *Lightroom Studio [2014]*

- Collaborated in high-paced multidisciplinary design team managing client projects including graphic designs, visual experiences, brand identities, websites, and residential and commercial buildings.
- Created competition materials for the City of Atlanta to promote the Atlanta BridgeScape Competition in 2015.

Architectural Designer: *Pelli Clarke Pelli Architects [2011 - 2012]*

- Led the firm to the cutting edge by informing veteran staffers of new best practices from the field of architecture at the globally renown design firm.
- Coordinated presentations with clients, designed projects including commercial towers and mixed-use masterplans, and implemented new computational design tools for creating cutting-edge buildings.

Freelance Visual Designer: *DEZAIN.io [2009 - present]*

- Designed deliverables ranging from visual designs, print publications, UX and UI products, renderings, brand identities, marketing promotions, infographics, and 3D modeling for over 60 clients over 12 years.
